

## SOME COMMON PESTS AND THEIR CONTROL

Pest	Control Measures	Remarks
Leafhopper	Malathion - DDT parathion	
Thrips	Lindane, malathion, parathion, dieldrin	See flower thrips.
Flower thrips	Spray with dieldrin or hepta- chlor E.C. Malathion aerosol on crop 3 or 4 applications.	For fan and pad cooling add 2 pints of 18% dieldrin E.C. per 100 gal. of circulating water. Repeat in 2 weeks.
Aphids	Malathion, lindane, parathion, sulfotepp, vapona, thiodan	Direct spray into growing point.
	Dimethoate or Thimet	Soil application as a systemic
Leafrollers and Caterpillars	Parathion, malathion, DDT, DDD, or Sevin	
Spider Mites	Malathion, sulfotepp, parathion, Aramite, Tedion	Non-resistant mites-use Aerosols or smokes.
	Aramite Tedion or Pentac sprays	Slightly resistant mites.
	Aramite + schradan sprays or Aramite + tedion sprays or Pentac + tedion	Highly resistant mites. All treatments at weekly intervals.
Note: Use Santomerse multifilm XL, or other wetting agent in these sprays.		
Slugs - Snails	Metaldehyde or Zectran dust, spray, baits	
Sowbugs	5% DDT dust; 5% chlordane dust	1 lb./1000 sq. ft.
Symphylids	Lindane in soil	6 ounces 25% W.P. or 10 lb. 1% dust per 1000 square feet. Make annual treatment.
Termites	DDT	1 qt. 25% E.C. - 100 gal. water. 1 qt. per square foot to soil under pots.
